Acknowledgement

I owe a great deal of gratitude to many people who have supported me in my internship journey and this project. This includes Ms. Sanjana Panda at Clevered, my mentors who have shared their knowledge and experience, Dr. Ken Kahn for providing us students with this wondrous learning experience, my enthusiastic classmates, and all the helpful forums and sites that provide a wealth of information and resources. I am also thankful for my parents and friends who have encouraged me along the way to put in tremendous effort into this internship. It truly has been a collective effort.

Thank you!

About Me

- Age: 17
- Grade: 12
- School: Indian School Muscat
- Skills:
 - Programming (Python, HTML, CSS, Java, JS, SQL)
 - iOS Mobile App Development
 - Data Analytics
 - Ethical Hacking
 - Computational Logic
- Linked Profile: [Karthikeyan Vinodkumar](#)

My Internship Journey

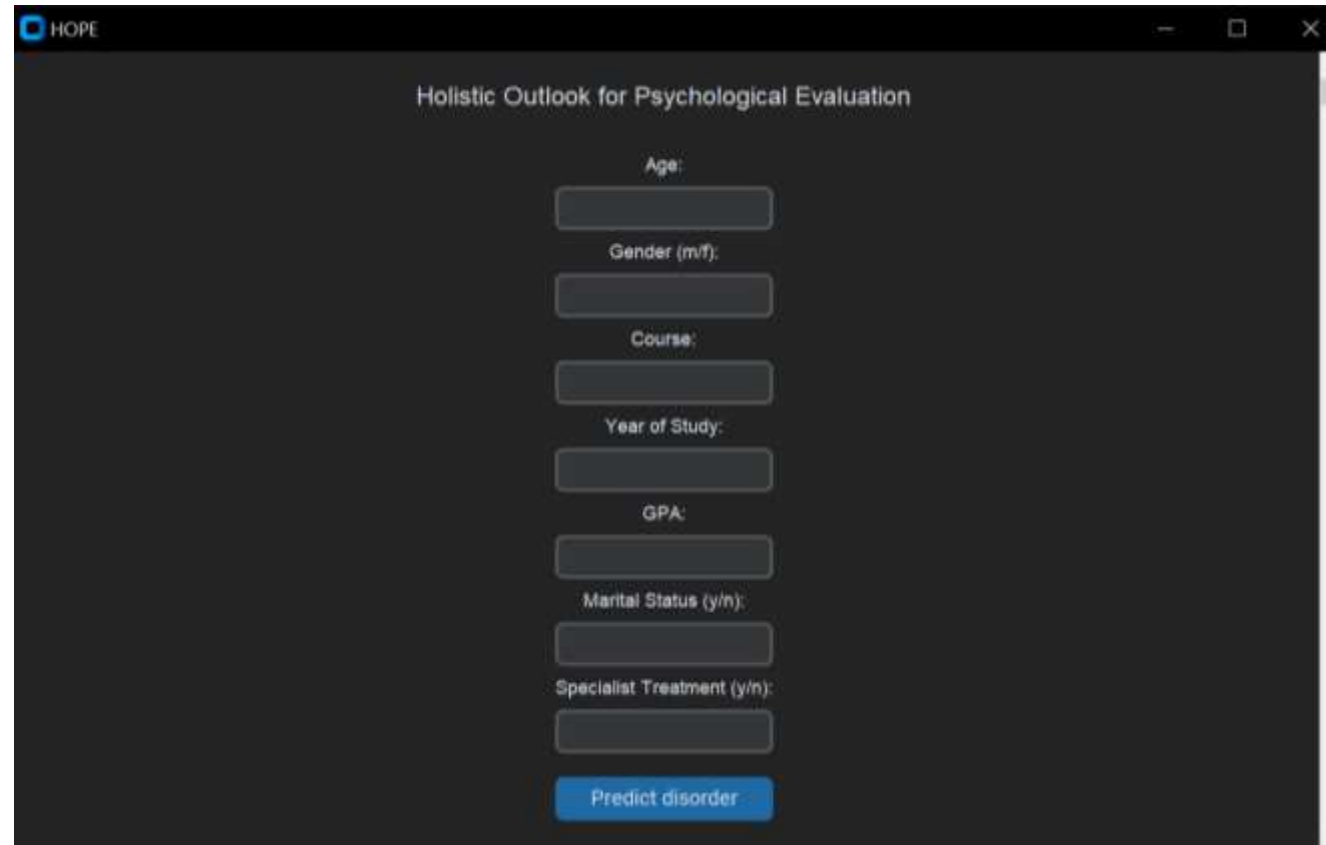

During my Artificial Intelligence Internship Program (AIIP) at Clevered, I was taught a wide range of skills in data science and machine learning. I learned about data preprocessing, statistical analysis, and predictive modeling. I was also introduced to various machine learning algorithms and techniques, such as regression, classification, and clustering. I had the opportunity to work on a highly complex project, applying these skills to real-world challenges. It was a valuable experience that helped me grow my understanding and application of AI.

About HOPE

Brief Description

- HOPE stands for Holistic Outlook for Psychological Evaluation.
- The importance of mental health in college students cannot be emphasized enough. As students leave everything familiar to them and enter university, they may experience emotional and mental strain. Students from different courses, ages and years may experience mental breakdown at some point in their life.
- HOPE is a multiclass classification model that can diagnose Depression, Anxiety and Panic Attack in college students of different courses.

Main Menu

The screenshot shows a web application window titled "HOPE" in the top-left corner. The main heading is "Holistic Outlook for Psychological Evaluation". Below this, there are eight input fields arranged vertically, each with a label above it: "Age:", "Gender (m/f):", "Course:", "Year of Study:", "GPA:", "Marital Status (y/n):", and "Specialist Treatment (y/n):". At the bottom of the form is a blue button labeled "Predict disorder". The interface is dark-themed with light gray text and input fields.

HOPE

Holistic Outlook for Psychological Evaluation

Age:

Gender (m/f):

Course:

Year of Study:

GPA:

Marital Status (y/n):

Specialist Treatment (y/n):

Predict disorder

Feature Description

- Age
 - Accepts the age of the patient.
 - Range that gives the most accurate results: 17-25
- Gender
 - Accepts the gender of the patient.
 - Accepts values as “male” or “Male” or “m” or “M” or any other equivalent.
- Course
 - Accepts course taken by the patient.
 - Accepts values as “Mat” or “mat” or “math” or “mathematics” or any other equivalent.

Feature Description

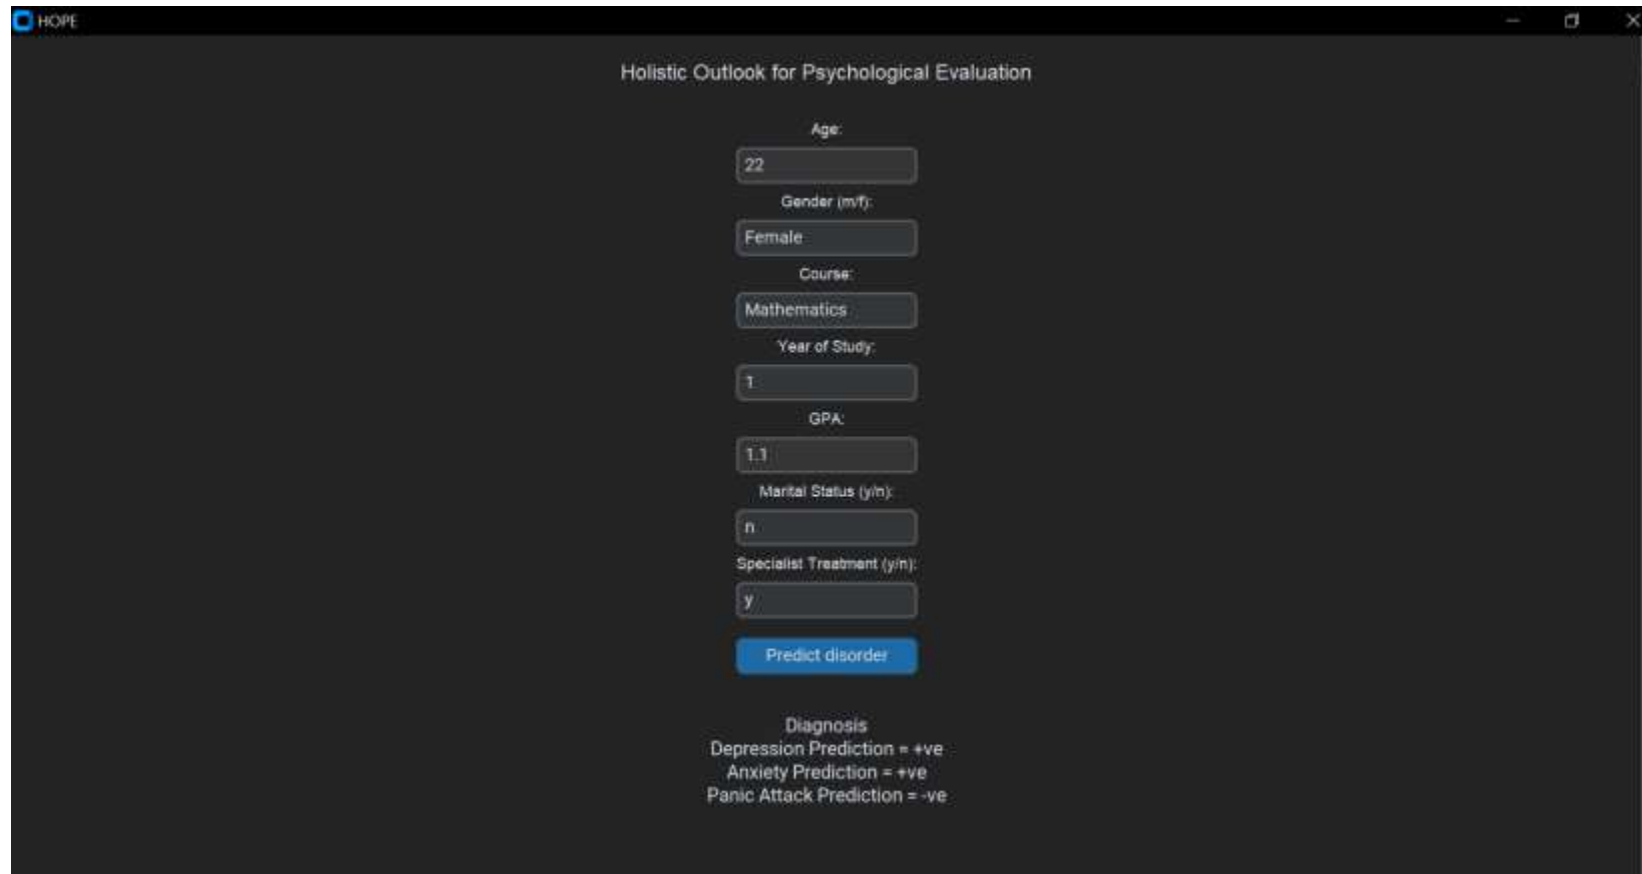

- Year of Study
 - Accepts the patient's current year of study.
 - Range that gives the most accurate results: 1-6
- GPA
 - Accepts the patient's Grade Point Average (GPA).
 - Range that gives the most accurate results: 0.00 – 4.00
- Marital Status
 - Accepts the marital status of the patient.
 - Accepts values as “yes” or “Yes” or “y” or “Y” any other equivalent.

Feature Description

- Specialist Treatment
 - Accepts any instance of specialist treatment.
 - Accepts values as “yes” or “Yes” or “y” or “Y” any other equivalent.

Note: HOPE has extremely reduced risks and dependencies and is very user-friendly.

App Trial

The screenshot shows a web application window titled "HOPE" in the top left corner. The main heading is "Holistic Outlook for Psychological Evaluation". Below this, there are several input fields for user data, each with a label above it: "Age:" with the value "22", "Gender (m/f):" with the value "Female", "Course:" with the value "Mathematics", "Year of Study:" with the value "1", "GPA:" with the value "1.1", "Marital Status (y/n):" with the value "n", and "Specialist Treatment (y/n):" with the value "y". Below these fields is a blue button labeled "Predict disorder". At the bottom, under the heading "Diagnosis", there are three lines of text: "Depression Prediction = +ve", "Anxiety Prediction = +ve", and "Panic Attack Prediction = -ve".

HOPE

Holistic Outlook for Psychological Evaluation

Age:
22

Gender (m/f):
Female

Course:
Mathematics

Year of Study:
1

GPA:
1.1

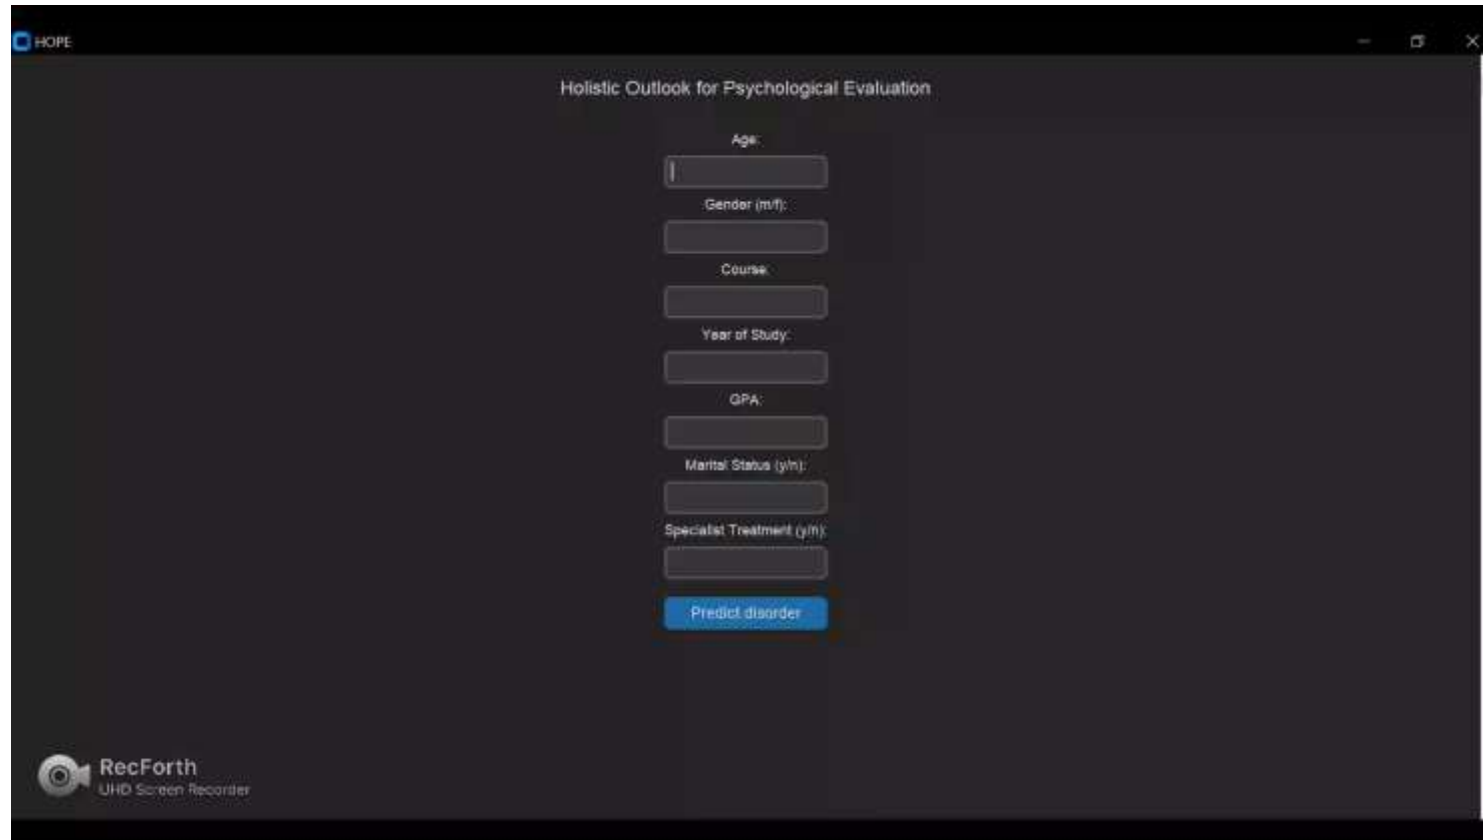

Marital Status (y/n):
n

Specialist Treatment (y/n):
y

Predict disorder

Diagnosis
Depression Prediction = +ve
Anxiety Prediction = +ve
Panic Attack Prediction = -ve

Demo Video

The screenshot shows a web application window titled "HOPE" in the top-left corner. The main heading is "Holistic Outlook for Psychological Evaluation". Below this, there is a vertical stack of input fields for user data: "Age:", "Gender (m/f):", "Course:", "Year of Study:", "GPA:", "Marital Status (y/n):", and "Specialist Treatment (y/n):". Each field is represented by a dark rectangular box. At the bottom of this stack is a blue button labeled "Predict disorder". In the bottom-left corner of the application window, there is a logo for "RecForth UHD Screen Recorder".
